

## Is it necessary to Register?

It is only necessary to register on the site if you wish to view some of the restricted pages, such as the full techniques library page.

There we have many of the basics techniques clearly explain so that a new or experienced student can begin to learn/review without having to spend any money. All we ask is that the student register with The Institute. We like to know who is interested in the site so we appreciate it very much when visitors take the time to register. Plus, registration takes less than 10 seconds, only a username and email address is required.
